

GARDEN & LANDSCAPE - INSTALLATION - TREES AND SHRUBS

General Information

GENERAL INFORMATION

PROMATE SCATTER is a blend of nonionic wetting agents impregnated onto an inert organic carrier. This results in a dry granular formulation that provides equal performance as liquid products when used at recommended rates. PROMATE SCATTER can be applied safely at full rates in both spring and summer.

PROMATE SCATTER is particularly useful for treating small areas of difficult to wet soil. PROMATE SCATTER also contains agents to prevent foaming problems.

Limitations, Restrictions, and Exceptions

GARDEN & LANDSCAPE

Installation

Trees and Shrubs: PROMATE SCATTER 0.75 lb. into hole and then apply 1 lb. over the surface for each foot of rootball diameter. Or, thoroughly mix 3½ lbs./cubic yard of backfill. Then continue applications according to instructions noted in Trees and Shrubs and Beds section of label.
