

## **ORNAMENTALS - HERBS - IMPORTED FIRE ANTS - USDA CERTIFICATION PERIOD (MO) - 7-12**

### General Information

#### ORNAMENTAL USE

(For soil incorporation into potting media used in containerized plantings of ornamental trees, shrubs, plants, flowers, conifers, Christmas trees, and non-bearing fruit and nut trees, and bushes.)

### Limitations, Restrictions, and Exceptions

#### ORNAMENTAL USE

#### HERB USE

For soil incorporation into potting media used in containerized plantings of the listed herbs.

Minimum pre-shipment interval is 70 days for herbs listed.

Application Instructions for Potting Media: Determine bulk density of the potting media by measuring the dry weight of a unit volume of the mix. Based on the length of control required, thoroughly mix the appropriate quantity of the Talstar Granular insecticide with equipment suitable to give uniform distribution in the potting media. Talstar Granular insecticide may be pre-mixed with an appropriate amount of sand (1:10) to ensure adequate distribution of the product of the mix.

Talstar Granular insecticide is approved under the USDA Plant Protection Imported Fire Ant Quarantine Certification program when used in accordance with USDA guidelines. Use the recommended application rates given to determine the length of control required for certification.

For specific rates for incorporating Talstar Granular insecticide in one cubic yard of potting media based on the known bulk density, refer to the label.
