

CELERY - GREEN PEACH APHID

General Information

GENERAL INFORMATION

ACEPHATE 75 SP is an insecticide for control of pests on selected agricultural crops and in certain non-crop areas. The active ingredient in ACEPHATE 75 SP is acephate, a water soluble insecticide readily absorbed by plant roots and foliage to give systemic control of feeding insects. Insect pests are generally controlled more effectively by ACEPHATE 75 SP through ingestion than by contact. Application of ACEPHATE 75 SP to maintain control should be repeated only as directed.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THE LABEL MAY RESULT IN POOR INSECT CONTROL, CROP INJURY, AND/OR ILLEGAL RESIDUES.

Do not apply under conditions involving possible drift to food, forage or other plantings that might be damaged or the crops thereof rendered unfit for sale, use or consumption.

NOTE: This product is sold by weight and package is full when packed, but due to the product's nature, settling is likely to occur.

Limitations, Restrictions, and Exceptions

ADDITIONAL USE INSTRUCTIONS

Apply in water at 50 to 100 gals. spray per acre by ground or in a minimum of 5 gals per acre by air.

Apply when eggs or insects appear and repeat at 3 to 10 day intervals but do not exceed maximum application rate of 2 2/3 lbs. of ACEPHATE 75 SP per acre per crop cycle.

USE PRECAUTIONS:

- All celery must be trimmed (tops removed) before shipment for use.
- Do not use trimmed (tops) for food or feed.
