

TURFGRASS - BLACK TURFGRASS ATAENIUS

General Information

GENERAL INFORMATION

ACEPHATE 75 SP is an insecticide for control of pests on selected agricultural crops and in certain non-crop areas. The active ingredient in ACEPHATE 75 SP is acephate, a water soluble insecticide readily absorbed by plant roots and foliage to give systemic control of feeding insects. Insect pests are generally controlled more effectively by ACEPHATE 75 SP through ingestion than by contact. Application of ACEPHATE 75 SP to maintain control should be repeated only as directed.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THE LABEL MAY RESULT IN POOR INSECT CONTROL, CROP INJURY, AND/OR ILLEGAL RESIDUES.

Do not apply under conditions involving possible drift to food, forage or other plantings that might be damaged or the crops thereof rendered unfit for sale, use or consumption.

NOTE: This product is sold by weight and package is full when packed, but due to the product's nature, settling is likely to occur.

Limitations, Restrictions, and Exceptions

Do Not Allow Livestock to Graze Treated Areas. Do Not Feed Treated Grass to Livestock. Use is limited to sod farms and golf courses, except when applying by mound or spot treatment for fire ant and harvester ant control.

RECOMMENDED APPLICATION

Apply the specified amount of ACEPHATE 75 SP per 1,000 sq. ft. Use a minimum of 5 Gallons water per 1,000 sq ft. Irrigate lightly after application (not more than 1/2 inch). Use the higher rate for severe infestations.
