

CROPS - AS A SPREADER-STICKER (POST-EMERGE)

Limitations, Restrictions, and Exceptions

AS A SPREADER-STICKER

1 pt per 100 gallons of herbicide or insecticide spray solution not to exceed 1 pt per acre.

For phenoxy acids (2,4-D Butyrac, etc.), use 1/2 the required amount of herbicide per acre.

For increased control, use 1 to 4 quarts per 100 gallons per recommendation of chemical label.
