

CROPS - AS A SPREADER-STICKER (POST-EMERGE)

Limitations, Restrictions, and Exceptions

AS A SPREADER-STICKER

0.25 pt per acre or 0.25-1 pt per 100 gallons of herbicide or insecticide spray solution per chemical label recommendations (not to exceed 0.25 pt per acre). For phenoxy acids (2,4-D, Butyrac, etc.), use 0.50 the required amount of herbicide per acre.
