

RIGHTS-OF-WAY - RHIZOME JOHNSONGRASS (UP TO 12 INCHES)

General Information

PRODUCT INFORMATION

Acclaim Extra Herbicide is a water emulsion formulation containing 0.57 pound of active ingredient per gallon. Acclaim Extra Herbicide is used for postemergence control of annual grass weeds and suppression of some perennial grass weeds in established turfgrass and ornamental species. Acclaim Extra Herbicide does not control broadleaf weeds or sedges.

Acclaim Extra Herbicide is absorbed through the foliage. Thorough coverage is important. Visual injury on the grass weed is evident approximately 4 to 10 days after application (dependent upon environmental conditions) but control of the grass weeds will take 12 to 21 days. Visible effects begin as a chlorosis (yellowing) and/or reddening of the leaf surface followed by death of the weed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply until you have read the entire label.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Limitations, Restrictions, and Exceptions

RIGHTS-OF-WAY

WILDFLOWER SPECIES

ESTABLISHED DESIRABLE NATIVE GRASSES

APPLICATION INFORMATION

Acclaim Extra Herbicide controls only grasses that have emerged at the time of spraying. Young, actively growing grassy weeds are more easily controlled than the larger grass weeds. Refer to the following application rate and timing recommendation chart for dosages. Avoid applications to grass under drought

stress.

Spray Application for Rights-of-Way

Apply with ground equipment using 30 to 100 gal of water/A and 30 to 60 psi of water to uniformly cover the vegetation in the area to be treated. Use a fixed boom, offcenter nozzles or boomless straight stream nozzles properly calibrated to a constant speed of travel and rate of delivery. Allow mowed areas to regrow for at least 14 days before applying Acclaim Extra Herbicide.

Spray Application for Spot Treatments

Add 40 fl oz of Acclaim Extra Herbicide per 100 gal of water and spray target weed thoroughly to the point of spray deposit runoff. Optimum results occur when spray pressure is sufficient to provide retention of spray deposit on target weed.

REPEAT APPLICATION INFORMATION

Repeat applications of Acclaim Extra Herbicide may be required under the following conditions (refer to Application Rate And Timing Recommendation Chart for dosages):

- (a) Continued grass weed seed germination after the initial application.
- (b) When dense populations of weeds prevent thorough spray coverage of the entire leaf surface of the target weeds.

Do not apply more than a total of 120 fl oz/A (2.75 fl oz/1,000 sq ft) per year. Avoid applying a second application of Acclaim Extra Herbicide sooner than 14 days after the first application. A second Acclaim Extra Herbicide application must only be made to grass weeds with vigorous regrowth.

SURFACTANTS AND CROP OILS

The addition of a nonionic surfactant or paraffin-based crop oil at a rate of 32 fl oz/100 gal of spray solution is prescribed for spray volumes between 30 and 100 gal/A. Thorough spray coverage is extremely important for optimum results.

NOTES FOR WEED CONTROL IN RIGHTS-OF-WAY

1. Adequate soil moisture will enhance the performance of Acclaim Extra Herbicide. Reduced control may occur with Acclaim Extra Herbicide applied under DROUGHT STRESS conditions.
2. Rainfall within one hour following application may cause a reduction in grass control.
3. Broadleaf herbicides containing 2,4-D will reduce the effectiveness of Acclaim Extra Herbicide. Tank mixes with Telar³, Escort³, or Garlon⁴ are recommended. Do

not apply Acclaim Extra Herbicide 5 days before a 2,4-D application or within 21 days following a 2,4-D application. DO NOT TANK MIX with any herbicides when applying Acclaim Extra Herbicide to wildflower species.

4. Acclaim Extra Herbicide is a selective grass weed herbicide and has little or no activity on broadleaf plants or sedges.

5. Fescues and ryegrass may be overseeded immediately following Acclaim Extra Herbicide applications. All other grass species must be overseeded after a 21- day waiting period.

6. Applications to Bermudagrass may result in temporary injury. Bermudagrass must be well established at the time of application, or severe injury may result.
