

## **BROADCAST TREATMENTS**

### General Information

FOR USE ON HOME LAWNS, GOLF COURSE AND COMMERCIAL AND RECREATIONAL TURF AND SOD FARMS

### GENERAL PRECAUTIONS AND INSTRUCTIONS

Always wear protective clothing and use appropriate equipment during application and handling. Avoid contact with granules. Avoid breathing dust.

This pesticide shall only be applied when the potential for drift to nearby bodies of water is minimal (that is wind speed is between 2-10 mph and wind is blowing away from the body of water).

California: The product can only be used in the Coachella Valley. Applications can only be made from April through September.

### USE RESTRICTIONS

Do not apply to pastures or other grazing lands.

Do not apply around fruit or nut trees, or any plant grown for food.

### GENERAL INFORMATION

Maxforce FC Fire Ant Bait is intended for use to control imported fire ants in turfgrass. The activity of the product may vary with rate of application, environmental conditions, and activity on foraging ants at time of application.

Do not apply in combination with other pesticides, fertilizers, and other biologically active materials.

No phytotoxic response on any turfgrass species has been observed to date.

Limitations, Restrictions, and Exceptions

### BROADCAST TREATMENTS

Calibrate and adjust equipment prior to application to ensure that the proper rate of product will be applied.

### Application Directions

**BROADCAST APPLICATIONS:** Make broadcast applications of the product to turfgrass to control existing active imported fire ant populations. Do not apply Maxforce FC Fire Ant Bait immediately before or after irrigation or rain. Fire ants will begin to die from a proper treatment in about 14 days. Do not reapply for 3-6 weeks.

- Adjacent Landscape Beds: Only apply to landscape beds which have adequate cover to prevent run-off. Do not apply to bare soil.
