

BEANS, CORN, COTTON, ETC.

General Information

SEED TREATMENT

VIGOR S is a ready- to- use seed treatment that is applied as a slurry treatment by machine. VIGOR S is used in combination with most other seed treatment products such as insecticides and fungicides. Do not mix with other fertilizers/ chemicals without a compatibility test. An adequate test for compatibility involves mixing in a small container the proper proportions of the product with water and the other ingredients. Agitate and let stand for one hour. If a precipitate form, apply the products separately. Use only on seeds for crops listed on the label. Do not use treated seed for food, feed or oil purposes. If this product is intended for commercial seed treatment, label the treated seed in accordance with the requirements of the Federal Seed Act and applicable State seed laws. Add an approved dye to distinguish treated seed and to prevent inadvertent use for food, feed, or oil purposes. If this product is for \"at planting\" use, treat only those seeds needed for immediate use and planting. Do not store excess treated seed beyond planting time. Dispose of excess treated seed by burial away from streams and bodies of water. A dye is not required.
