

LAWN AND SPORTS FIELDS

General Information

GENERAL INFORMATION

AQUEDUCT Granular Formulation is a nonionic soil surfactant impregnated onto an inert carrier. This results in a dry granular formulation that provides performance equal to AQUEDUCT Liquid Formulation with the convenience of a spreader application. AQUEDUCT was developed to provide turf managers with an effective tool to treat existing localized dry spots, wet spots, and other water related problems without concern of burning turf. Used as directed AQUEDUCT is biodegradable and non-toxic to plants and animals. AQUEDUCT can safely be applied in the spring, before the irrigation system is activated, as well as during the summer when environmental stress conditions may impact turf performance.

Limitations, Restrictions, and Exceptions

LAWN AND SPORTS FIELDS

Apply 2.5 lbs of AQUEDUCT/1000 sq ft (1.25 kg/100 sq m). Reapply at 2.5 lbs/1000 sq ft on a weekly basis until problem is alleviated. Continue to use on a monthly basis as needed at 2.5 lbs of AQUEDUCT/1000 sq ft (1.25 kg/100 sq m). AQUEDUCT DOES NOT NEED TO BE WATERED IN FOLLOWING APPLICATION. Irrigate before next mowing or leave baskets off.

Aquatrols highly recommends the use of Primer Select if a preventative program is desired.
