

TURF, ORNAMENTAL AND INDUSTRIAL SPRAYING

General Information

GENERAL INFORMATION:

REIGN LC is an effective, easy-to-use adjuvant for deposition improvement and drift retardation in spraying operations. REIGN LC is compatible with most water soluble and wettable powder pesticides, desiccants and cotton defoliants when applied by aerial application or standard ground equipment.

Limitations, Restrictions, and Exceptions

REIGN LC use precautions: The degree of drift hazard varies with the type of pesticide, application conditions and vegetation near the sprayed area.

Consult your local agricultural advisor. Remember, pesticide drift is no accident.

Common sense and sound application technology must be followed when spraying pesticides. REIGN LC will retard, but not totally eliminate, drift.

To avoid product degradation and equipment corrosion, do not use iron, copper, or aluminum containers or equipment. This material reacts slowly with iron, copper and aluminum, resulting in corrosion and product degradation. Do not store near oxidizing agents.
