

AERIAL APPLIED (BELOW 45 PSI) - STRAIGHT BACK NOZZLE ORIENTATION

General Information

GENERAL INFORMATION:

REIGN is an effective, easy-to-use adjuvant for deposition improvement and drift retardation in spraying operations. REIGN is compatible with most water soluble and wettable powder pesticides, desiccants and cotton defoliant when applied by aerial application or standard ground equipment. REIGN will retard, but not totally eliminate drift.

THIS PRODUCT CAN BE USED IN THE FOLLOWING SETTINGS: AGRICULTURAL, AQUATIC, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, ORNAMENTAL, RIGHTS-OF-WAY AND TURF. (NOT FOR AQUATIC USE IN WASHINGTON.)

Limitations, Restrictions, and Exceptions

REIGN DIRECTIONS FOR USE -

Step 1: Select correct rate from chart below.

Step 2: Fill mix tank with water and pesticide. Then start to agitate.

Step 3: Add R E I G N .

Step 4: If additional surfactant or other spray adjuvants are used, they should be added after REIGN.

Step 5: Continue to agitate mix tank at least 2 minutes before spraying.

Step 6: Follow all cleanup precautions on label of pesticide used.
