

AIR AND GROUND APPLICATIONS

General Information

GENERAL INFORMATION

No Foam is a concentrate defoamer useful for controlling both entrained air and surface foam in agricultural sprays.

No Foam performs well with all agricultural chemicals and is especially effective with thickening agents used for agricultural sprays.

No Foam is especially effective in recirculating sprayers or other high agitation equipment.

No Foam is a 10% active silicone, approved for use as a spray adjuvant or in food processing under 40 CFR 180.960

Not for aquatic use.

Limitations, Restrictions, and Exceptions

To control foam in a premix before it forms, use at a rate of 1 ounce per 100 gallons of solution. If existing foam is present, a rate of 1-2 ounces per 100 gallons may be required. Rates of No Foam may vary with tank size, type of agitation, chemical being used, and type of water being used.

Air Applications: Add to premix tank as soon as possible during filling.

Ground Applications: Add to spray tank as soon as possible during filling.
