

ON FARM COTTON SEED TREATMENT

General Information

GENERAL INFORMATION

NU-FLOW M-HF Seed Treatment Fungicide is recommended as a seed treatment to protect against sore shin (*Rhizoctonia solani*) and black root rot (*Thielaviopsis basicola*) which impairs good cotton seed germination and seedling development. NU-FLOW M-HF can be tank-mixed with other properly labeled cottonseed protectants such as Apron TL for Pythium control. NU-FLOW M-HF is a liquid formulation that can be pumped or poured directly into the cotton seed treater or diluted with water, provided the recommended amount of product is applied.

Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.

Limitations, Restrictions, and Exceptions

ON FARM COTTON SEED TREATMENT

For mechanical treaters or hopper box treatments, dilute 1.25 to 4 fl. oz of Nu-Flow M-HF (0.019 to 0.062 lb active ingredient) with 8 to 10 fl. oz of water and apply to 100 lbs of cotton seed. Other cotton seed hopper box products such as Delta Coat AD or Nu-Flow ND may be applied with Nu-Flow M-HF. Always follow the label recommendations on the respective products.
