

AIRCRAFT AND GROUND EQUIPMENT

General Information

GENERAL INFORMATION

REGUARD is an extender and sticker designed to extend the life of pesticides. It may be used with all pesticide products and soluble fertilizers.

REGUARD forms a durable film that holds a pesticide on the crop foliage. This shield reduces the effects of environmental factors, which may decrease the effectiveness of pesticides.

NOT FOR AQUATIC USE.

REGUARD will not foam or clog nozzles. It may be applied by aerial, ground or concentrate sprayer. It enhances the initial pesticide application to give complete coverage.

REGUARD prevents the removal of the pesticide from the leaf surface by rainfall and wind. It screens the pesticide spray residue from ultraviolet rays which often cause pesticide degradation. Pesticide volatilization is minimized by the protective shield.

Under most conditions, apply sprays containing REGUARD and allow at least one hour of daylight before an anticipated rain. Sunlight for this time period is required for the protective shield to set.

Limitations, Restrictions, and Exceptions

- To extend the activity and increase the efficiency of insecticidal and fungicidal sprays when applied by aircraft or ground equipment: Use 1 pint of REGUARD per acre.
