

TRANSPLANTS

General Information

Mixing and Handling Instructions

Apply in a minimum of 10 gallons water per acre for ground spray equipment or 2 gallons water per acre for aerial application. May also be applied via drip or sprinkler fertigation.

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application. Be cautious when mixing this product with phosphate solutions.

Limitations, Restrictions, and Exceptions

Transplants: 1-2 quarts per 100 gallons of water and drench transplant thoroughly.
