

FIELD, ROW, VEGETABLE, FRUIT, TREE AND VINE CROPS

General Information

General Information

MANNI-PLEX Ni is designed for application to all field, row, vegetable, fruit, tree and vine crops, and ornamentals for the prevention and correction of nickel deficiency when used as part of a balanced fertility program.

Mixing and Handling Instructions

Apply in a minimum of 10 gallons water per acre for ground spray equipment or 2 gallons water per acre for aerial application. MANNI-PLEX Ni may also be applied via drip or sprinkler fertigation.

Put 1/3 to 2/3 of total required water volume in tank. Add adjuvants, fertilizers and pesticides if desired and agitate until thoroughly mixed. Add recommended amount of this product and agitate until thoroughly mixed. Fill tank with remainder of water.

Check chemical mixture compatibility using a jar test prior to application. Be cautious when mixing with phosphate solutions.

WARNING: Some crops may be injured by the application of nickel. Do not exceed maximum recommended rate.

Limitations, Restrictions, and Exceptions

Field, Row, Vegetable, Fruit, Tree and Vine Crops: Apply 8-16 fl. oz. per acre per application throughout the growing season. At least 3 applications are recommended. More frequent applications at 8 oz. per acre may be needed to correct deficiencies once they occur.
