

PRE-PLANTING APPLICATION

General Information

DIRECTIONS FOR USE

Use this product on soils to control various plant nematodes such as: root knot, root-lesion, citrus, stubby-root, soybean cyst, sting, lance, stylet and dagger.

NEO-TEC G.S.O. may be applied using any hand or power operated gravity or rotary type spreader designed for application of granular types of materials. NEO-TEC G.S.O. may be used for pre-planting of annual plants or post-planting applications of annual, perennial or established plants, trees, or turf areas. NEO-TEC G.S.O. is also suitable for treatment of individual trees and shrubs.

REPEAT APPLICATIONS

NEO-TEC G.S.O. should be applied at least twice during the spring and autumn seasons. If conditions warrant, NEO-TEC G.S.O. may also be reapplied on an as needed basis.

Neo-Tec G.S.O. is activated by the presence of water, either by rainfall or by artificial application.

Limitations, Restrictions, and Exceptions

PRE-PLANTING APPLICATION

For best results apply before each growing season. Apply NEO-TEC G.S.O. evenly over the entire area at a rate of 200 lbs/acre of treated soil (4.5 lbs/1,000 sq. ft). Incorporate NEO-TEC G.S.O. lightly into the soil to a depth of one to three inches by discing or other means, then plant as usual.
