

SOIL APPLICATION - HEAVY MICRONUTRIENT DEFICIENCY APPLICATION

General Information

GENERAL INFORMATION

KEYLATE Zinc is formulated to be used in fertilizer solutions. Broadcast or row applications are acceptable, although greater efficiency may be expected from row applications. Micronutrient deficiencies usually occur when plants are small; therefore, micronutrients should be added to the fertilizer at or before planting.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION - HEAVY MICRONUTRIENT DEFICIENCY APPLICATION:

KEYLATE Zinc can be incorporated in liquid fertilizer or applied separately.

Apply the following rate if you do not have a soil or leaf analysis.
