

DECIDUOUS TREES, BERRIES AND VINES

General Information

General Information ROOT FEED II is a form of nitrogen which is used to supplement an existing nitrogen program. Users should take into account that ROOT FEED II contains 1 lb of nitrogen per gallon.

Limitations, Restrictions, and Exceptions

Apply 5 to 10 gallons per acre (50 to 100 liters per hectare) every 7 to 14 days through irrigation water. Treatment should be applied during the later stages of the watering cycle. Once applications have begun, treatments must be maintained on a 7 to 14 day schedule until harvest for full benefits to be realized. When ROOT FEED II has been applied to a crop, do not stop its use until harvest is over. Any stop in use may adversely affect the crop.

- Begin applications before green tissue appears. Continue applications until 2 weeks after harvest.
