

SOIL APPLICATION

General Information

GENERAL INFORMATION

FOLI-GRO TRIPLE 7 is designed primarily for foliar applications to prevent or correct micronutrient deficiencies in a wide range of agronomic and ornamental plants. Its use is suggested as a supplement to a regular, balanced fertilizer program to enhance yields and improve quality. FOLI-GRO TRIPLE 7 is a low salt index fertilizer, contains no chloride and contains 100% orthophosphate.

Application of FOLI-GRO TRIPLE 7 is a means of obtaining a quick response to needed elements. Foliar applications of FOLI-GRO TRIPLE 7 may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or to crops suffering from a weakened root system.

FOLI-GRO TRIPLE 7 should be used as part of a comprehensive Total Nutrition System for optimizing plant growth, development, yield and quality.

Limitations, Restrictions, and Exceptions

Do not apply when plants are under excessive heat or moisture stress. Applications of foliar nutrients to leafy vegetables or soft-skinned fruits during periods of excessive temperatures may cause cosmetic injury. Applications of certain micronutrients to fleshy fruits within 30 days of harvest may result in staining of rind or skin.

Do not apply directly to seed.
