

APPLES AND PEARS - POST-BLOOM

General Information

GENERAL INFORMATION

FOLI-GRO Western Mix is designed primarily for foliar applications to prevent or correct micronutrient deficiencies in a wide range of agronomic and ornamental plants. Its use is suggested as a supplement to a regular, balanced fertilizer program to enhance yields and improve quality. Application of FOLI-GRO Western Mix is a means of obtaining a quick response to needed elements. Foliar applications of FOLI-GRO Western Mix may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or to crops suffering from a weakened root system. FOLI-GRO Western Mix should be used as part of a comprehensive Total Nutrition System for optimizing plant growth, development, yield, and quality.

Limitations, Restrictions, and Exceptions

Apply 1 to 4 quarts per acre with sufficient water for thorough coverage with existing cover spray program. For post harvest and soil application, please consult general application recommendations.
