

## **APPLICATION IN IRRIGATION WATER**

### General Information

GAINER is generally compatible with pesticides and other fertilizers. Determine compatibility with a jar test before mixing products.

COMPATIBILITY: GAINER is compatible with most commonly used pesticides. Do not use with lead arsenate, hydrated lime, lime sulfur, or other strongly alkaline materials. Do not use with amine form of 2,4-D or with dicamba (e.g. Banvel). In all cases, it is recommended that a jar test be made to determine compatibility of GAINER with other materials before proceeding with high volume mixing.

### Limitations, Restrictions, and Exceptions

Use of anti-siphon or back-check valve is recommended to prevent material from running back into primary water supply. This product may be used for drip irrigation provided a compatibility test reveals no detrimental interaction between the product and the irrigation water.
