

WITH PESTICIDES OR HERBICIDES APPLICATION

General Information

RECOMMENDATIONS

Crops: Liquid Magnesium 4% can be used on any agricultural crop where a sulfur, and magnesium deficiency exists or where added soluble magnesium would be beneficial.

Compatibility: Liquid Magnesium 4% is formulated to mix with most commonly used insecticides and fungicides. However, a jar test for compatibility should be performed prior to application. This product is not recommended for use with copper or tin fungicides.

Limitations, Restrictions, and Exceptions

WITH PESTICIDES OR HERBICIDES APPLICATION:

ALWAYS add this product to spray tank BEFORE adding the herbicide or pesticide. The alkaline water usually encountered will require 1-2 quarts per 100 gallons of spray water. AVOID foliar applications of this product when plants are under moisture stress. Immediate post-irrigation or post-rainfall applications give best foliar uptake of nutrients. Avoid periods of high temperatures or low humidity. ACTIVELY growing plants with young leaves absorb nutrients most effectively. ADDITION of nitrogen (for example 5 lbs. of Lo-Bi urea per 100 gals. of spray) will increase efficiency of nutrient uptake.

LIQUID FERTILIZER APPLICATIONS:

This product may be applied with all nitrogen solutions. Thoroughly mix this product with the nitrogen solution before applying.
