

NUTRIENT MAINTENANCE - (ALL CROPS)

General Information

Derived from copper sulfate.

This product is complexed with lignosulfonate.

DIRECTIONS FOR USE:

Copper 5% is designed to be used as a foliar spray to supplement a complete fertility program.

Crops: Liquid Copper 5% can be used on any agricultural crop where a copper deficiency exists or where added soluble copper or sulfur would be beneficial.

Compatibility: Liquid Copper 5% is formulated to mix with most commonly used insecticides and fungicides. However, a jar test for compatibility should be performed prior to application. This product is not recommended for use with copper or tin fungicides.

Limitations, Restrictions, and Exceptions

NUTRIENT MAINTENANCE - (ALL CROPS):

The lower rates are for field, row and vegetable crops. The higher rates are for fruit, tree, vine, ornamental and turf crops. When rates of over 2 quarts are called for, split or multiple applications of 2 quarts or less each are preferred. Applications should be separated by a minimum of 10-14 days.

CONVENTIONAL (DILUTE) SPRAY APPLICATIONS: While the entire required quantity may be applied at one time, split applications will improve overall efficiency of uptake and will be more effective. Apply the required amount of this product with enough water for good coverage. Complete wetting of the foliage is not required.
