

# **TURF GRASSES**

## General Information

### GENERAL INFORMATION

This product is recommended to prevent or correct iron deficiencies. This should be used on the basis of a soil and/or tissue analysis.

ULTRA-CHE Iron 4.5% HEDTA is generally compatible with pesticides and fertilizer solutions. It is always advisable to test for compatibility on a small scale before tank mixing product.

### Limitations, Restrictions, and Exceptions

Make 3 to 5 applications per year, depending on need and the fertilization program in your region. Spray volumes can range from 1 to 4 gallons per 1,000 sq. ft. for adequate coverage. May be used on all turf grasses including: bluegrass, perennial ryegrass, and other northern grasses, bahiagrass, tall fescue, seashore paspalum grass, St. Augustine grass, zoysia grass, centipede grass, bentgrass and bermudagrass.
