

## **HIGH APPLICATION RATES**

### General Information

#### FEATURES & USE TIPS:

- 50% of the total nitrogen is treated with NutriSphere-N
- NutriSphere-N is a proprietary nitrogen management tool that has been shown to prolong desirable turf color up to eight weeks.
- Contains Avail phosphorous fertilizer enhancer, resulting in greater plant uptake of applied phosphorous.
- SGN 215 for use on fairways, roughs and other turf areas.

Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

Refer to label for Spreader settings, application and instructions.

#### Limitations, Restrictions, and Exceptions

Apply only as directed.

For all applications:

- Apply to dry foliage.
- Water in after application with a minimum of 0.2 inches to help move particles into the turf canopy.
- Do not collect clippings for at least one mowing following application to avoid particle pick-up.
