

TURF

General Information

GENERAL INFORMATION

The Andersons Turf Fertilizer 30-3-9 provides grass with nitrogen, phosphate and potash for maintaining strong, vigorous turf.

The nitrogen in this product is both readily and slowly available which makes this product excellent for applications throughout the growing season when the minimum soil temperatures are greater than 55°F to 60°F and not exceeding 85°F.

This product is dust free and free flowing. The uniform particle sizing assures easy and accurate applications.

Refer in the label for Suggested Spreader Settings.

Limitations, Restrictions, and Exceptions

WHEN AND HOW TO USE

In the spring, or as soon as weather and ground conditions permit, apply 2.50 to 4.17 pounds of this product per 1,000 square feet. Repeat every six to eight weeks throughout the growing season.

To ensure that you have the best possible fertilization program, use fertilizers in conjunction with a soil and tissue test program operated by a state certified laboratory familiar with the soils of your region. Cooperative extension agents can provide the names of recommended labs in your area.

Apply only as directed.

Note: This product contains the micronutrient iron for extra greening and to help prevent iron deficiency. Iron may stain concrete and other surfaces. Misapplied product to these surfaces should be removed promptly by sweeping or blowing.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

DO NOT WASH OFF WITH WATER.
