

## COMMERCIAL USE

### Limitations, Restrictions, and Exceptions

Symbex 4X Organic can be ground applied or metered through irrigation. If ground applying, ensure that Symbex 4X Organic is incorporated into the soil immediately after application, either mechanically or with sufficient water to wet soil to a depth of 1 inch. Symbex 4X Organic can be mixed with most organic fertilizers. A compatibility check is recommended. Symbex 4X Organic is intended to supplement and enhance a full ground fertility program as recommended in accordance with a reliable soil analysis. If you have any questions regarding mixing or application rates contact your Agro-K dealer before using this product.
