

## USE RATES

### General Information

#### GENERAL INFORMATION

PREMIUM MSO 1000 is a multi-component spray adjuvant developed to maximize the performance of most post-emergent herbicides. This product may be used as a replacement for non-ionic surfactants and crop oil (petroleum oils) in most post-emergence herbicide spray mixes. Methylated seed oils have been tested by universities, and research indicates methylated seed oil improves the performance consistency of post-emergence herbicides such as Flexstar, UltraBlazer, Classic, Pursuit and other herbicides.

#### DIRECTIONS FOR USE

Use this product at 1½ to 2 pints per acre with the herbicide of choice. Always refer to the herbicide labels for additional recommendations or precautions. SHAKE WELL BEFORE USING.

#### Limitations, Restrictions, and Exceptions

The 2 pints per acre rate may be required if weed populations are extreme or if plants are stressed at the time of treatment.
