

## **ROW CROPS**

### General Information

#### INFORMATION

Dyna-Flo 12•3•6 Plus is a complete foliar nutritional spray with amino acids and natural organic catalytic enzymes. The supplemental N•P•K aids in photosynthesis, enhances root development, better flowering, fruit set and quality. Dyna-Flo 12•3•6 Plus increases tolerance to temperature extremes. Humic acid promotes cell elongation.

Due to the nature of humic acid, it is advisable to shake well before each use.

#### DIRECTIONS FOR USE

Shake Well Before Each Use - Dyna-Flo 12•3•6 Plus will act as a buffering agent (lower water pH) if added to spray tank prior to adding other materials. For dilute ground application, use adequate water to ensure coverage.

Concentrate ground application: Use minimum 20 gallons water per acre. Air application: Apply specific rate in at least 5 gallons of water per acre. More water will give better coverage. The addition of a non-ionic surfactant will aid in more uniform coverage and uptake.

#### Limitations, Restrictions, and Exceptions

#### PRECAUTIONS

Avoid getting in eyes, mucous membranes or on skin. Use of side-shielded safety glasses is recommended. Use with adequate ventilation. Keep container capped when not in use. Do not contaminate feed, seed or water supplies. Keep away from children. NOTE: Avoid spraying on concrete or painted surfaces as staining may occur.
