

VEGETABLES (TRANSPLANT SOLUTION)

General Information

PRODUCT INFORMATION

Dyna-Flo Quik-Start Plus is a complete starter fertilizer that may be used in transplant water or as a foliar spray. When used at the recommended rates on ornamentals and most seeded and transplanted vegetable crops, it will stimulate early and rapid root development. Quik-Start Plus is designed to give maximum availability of phosphorus and other elements during cool or wet conditions and during the early stages of plant growth.

DIRECTIONS FOR USE

Quik-Start Plus should be used with adequate water to ensure good coverage. A jar test to check the compatibilities of new or unfamiliar combinations should be performed prior to mixing and application.

Concentrated Ground Application: Use a minimum of 20 gallons of water per acre.

Air Application: Use recommended rate in 5 to 10 gallons of water per acre.

Limitations, Restrictions, and Exceptions

Vegetables: Apply 2-4 quarts per 100 gallons in transplant solution.
