

CITRUS AND FRUIT CROPS - YOUNG TREES

General Information

PRODUCT INFORMATION

Dyna Gold MZ liquid foliar spray is a liquid foliar formulation designed for maximum uptake of zinc and manganese and should correct and prevent deficiencies in most tree crops. If added to the spray tank first, it will aid in lowering water pH. A jar test to check the compatibilities of new or unfamiliar combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and / or urea nitrogen will aid in uptake.

DIRECTIONS FOR USE

Dyna Gold MZ liquid foliar spray should be applied at 2-3 quarts per acre in enough water to cover.

Limitations, Restrictions, and Exceptions

Citrus and Fruit Crops:

Young trees: Use 2 quarts per 100 gallons of water and cover leaf surface thoroughly but not run off.
