

FLANK AND UDDER WASHING

General Information

GENERAL INFORMATION

BioSentry BioQuat 20 Disinfectant is an efficient disinfectant and sanitizer of high germicidal potency. Recommended use solutions are odorless, non-corrosive to metal surfaces and are non-staining.

Fulfills the criteria Appendix F of the Grade A Pasteurized Milk Ordinance 1965 recommendations of the U.S. Public Health Service in waters up to 400 ppm of hardness calculated as CaCO₃ when tested by the A.O.A.C. Germicidal and Detergent Sanitizers Official Method.

DIRECTIONS FOR USE

This product is not to be used as a terminal sterilant / high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical devices prior to sterilization or high-level disinfection.

Limitations, Restrictions, and Exceptions

FLANK AND UDDER WASHING

Prepare an udder wash solution of one (1) ounce of this product per eight (8) gallons of tepid water. Place a separate paper or clean cloth towel for each cow to be milked in this solution. Thoroughly wash each cow's teats and udder with a separate towel. After washing, wring excess solution from the towel and dry the udder and teats before attaching cow to milkers. Discard the towel. Never place a used towel back into the wash solution. Prepare solutions in a clean stainless steel or plastic bucket. Never reuse udder wash solution.
