

POULTRY AND SWINE PREMISE DISINFECTION - POULTRY, HATCHERIES AND SWINE PREMISES

General Information

Spectrasol Disinfectant is a phosphate-free, pH neutral formulation designed to provide effective cleaning, deodorizing, and disinfection for hospitals, nursing homes, schools, food processing plants, food service establishments, transportation terminals, office buildings, manufacturing facilities, lodging establishments, retail businesses, athletic facilities, sports stadiums, amphitheaters and convention centers where housekeeping is of prime importance in controlling cross-contamination from treated surfaces.

Spectrasol Disinfectant, when used as directed, is formulated to disinfect the following hard non-porous inanimate environmental surfaces: Floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, artificial turf surfaces, vanity tops, shower stalls, bathtubs, and cabinets.

Spectrasol Disinfectant is for use in:

- Food processing plants, dairy farms, hog farms, poultry and turkey farms and egg processing plants.
- Veterinary clinics, animal life science laboratories, kennels and cages, breeding and grooming establishments, pet animal quarters, zoos, pet shops, and other animal care facilities.
- For larger areas such as operating rooms and patient care facilities, this product is designed to provide both general cleaning and disinfecting.

Spectrasol Disinfectant is a one-step neutral disinfectant that is effective against a broad spectrum of bacteria, is virucidal* (including HIV-1, HIV-2, HBV and HCV) and inhibits the growth of mold and mildew and their odors when used as directed.

Limitations, Restrictions, and Exceptions

Poultry and Swine Premise Disinfection:

Site Preparation: The first step in any on-going disinfection program should be the removal of gross contamination and debris. This may be accomplished using a shovel, broom, or vacuum depending on the area to be disinfected. The efficacy of even the most efficient germicidal cleaner is reduced in the presence of heavy organic matter. Once the heavy debris is eliminated, thoroughly clean all surfaces with soap or detergent and rinse with water.

Cleaning and Disinfection: For all general cleaning and disinfection, use one (1) ounce of Spectrasol Disinfectant per gallon of water. Apply Spectrasol Disinfectant using a cloth, mop or low pressure coarse sprayer so as to thoroughly wet surface to be disinfected. Allow to remain wet for 10 minutes and then let air dry. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution after each use.

Poultry, Hatcheries, and Swine Premises: Remove all animals and feeds from premises, trucks, cars, coops and crates. Remove all litter, droppings and manure from floors, walls and surfaces of facilities occupied or traversed by animals. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. Use one (1) ounce of Spectrasol Disinfectant per gallon of water. Saturate surfaces with the recommended disinfecting solution for a period of 10 minutes. Ventilate buildings, coops and other closed spaces. Do not house animals or employ equipment until treatment has been absorbed, set or dried. Thoroughly scrub treated feed racks, troughs, automatic feeders, fountains and waterers with soap or detergent, and rinse with potable water before reuse. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing litter and manure.
