

# **DIRECTIONS FOR HATCHERY ROOMS USING FOGGING DEVICES (NOT FOR USE IN CALIFORNIA)**

## General Information

Spectrasol Disinfectant is a phosphate-free, pH neutral formulation designed to provide effective cleaning, deodorizing, and disinfection for hospitals, nursing homes, schools, food processing plants, food service establishments, transportation terminals, office buildings, manufacturing facilities, lodging establishments, retail businesses, athletic facilities, sports stadiums, amphitheaters and convention centers where housekeeping is of prime importance in controlling cross-contamination from treated surfaces.

Spectrasol Disinfectant, when used as directed, is formulated to disinfect the following hard non-porous inanimate environmental surfaces: Floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, artificial turf surfaces, vanity tops, shower stalls, bathtubs, and cabinets.

Spectrasol Disinfectant is for use in:

- Food processing plants, dairy farms, hog farms, poultry and turkey farms and egg processing plants.
- Veterinary clinics, animal life science laboratories, kennels and cages, breeding and grooming establishments, pet animal quarters, zoos, pet shops, and other animal care facilities.
- For larger areas such as operating rooms and patient care facilities, this product is designed to provide both general cleaning and disinfecting.

Spectrasol Disinfectant is a one-step neutral disinfectant that is effective against a broad spectrum of bacteria, is virucidal\* (including HIV-1, HIV-2, HBV and HCV) and inhibits the growth of mold and mildew and their odors when used as directed.

## Limitations, Restrictions, and Exceptions

(Not For Use in California)

## Directions for Hatchery Rooms Using Fogging Devices:

Remove all animals and feed from premises, vehicles and enclosures. Remove all litter and manure from floors, walls, and surfaces of the room to be treated. Empty all troughs, racks and other feeding and watering appliances. Close room off so fog is confined to room to be treated. Mix two parts of Spectrasol Disinfectant to five parts water (1 gallon of Spectrasol Disinfectant to 2 1/2ons of water). Insert the nozzle of the fogger through a suitable opening into the room. With the setting in maximum output, fog for one minute for each 4000 cubic feet of space in the room. When fogging is completed, ventilate buildings and other closed spaces. Do not house livestock or employ equipment until treatment has been absorbed or dried. Thoroughly clean all surfaces with soap or detergent and rinse with water.
