

DICONDRA LAWNS

General Information

DESCRIPTION

Lawn and Garden is a premium quality concentrated fertilizer product in a 2-1-1 ratio of Nitrogen, Phosphate and Potash combined with Sulfur, Iron, and Zinc. All of these are formed into a homogeneous pellet that is dust free and gives more uniform distribution of Primary, Secondary and Micro Nutrients during application. It is not merely a blend of several different materials, hence with homogeneous fertilizer there is no segregation.

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE

DICONDRA LAWNS

These lawns require lighter, more frequent feedings than bladed grasses. Apply 1lb. Per 300 sq. ft. Twenty pounds will feed 6,000 sq. ft. and forty pounds will feed 12,000 sq. ft.
