

## GROUNDCOVER PLANTINGS

### General Information

#### DESCRIPTION

Lawn and Garden is a premium quality concentrated fertilizer product in a 2-1-1 ratio of Nitrogen, Phosphate and Potash combined with Sulfur, Iron, and Zinc. All of these are formed into a homogeneous pellet that is dust free and gives more uniform distribution of Primary, Secondary and Micro Nutrients during application. It is not merely a blend of several different materials, hence with homogeneous fertilizer there is no segregation.

#### Limitations, Restrictions, and Exceptions

#### DIRECTIONS FOR USE

#### GROUNDCOVER PLANTINGS

Ivy, Gazania, Wild Strawberry, Rosemary, Ajuga, Lantana, Star Jasmine, Juniper, Ivy Geranium, Vinca

Broadcast 1lb. Per 100 sq. ft. of planting area. Repeat every 6 to 8 weeks through the growing season. Wash pellets off foliage. WATER THOROUGHLY AFTER APPLICATION
