

ROSES, FLOWERING SHRUBS AND EVERGREENS

General Information

DESCRIPTION

Superior Turf Food is a premium quality homogeneous fertilizer product in a 2-1-1 ratio of Nitrogen, Phosphate and Potash combined with Sulfur, Iron, and Zinc. All of these are formed into a homogeneous pellet that is dust free and gives more uniform distribution of Primary, Secondary and Micro Nutrients during application. It is not merely a blend of several different materials, hence with homogeneous fertilizer there is no segregation.

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE

ROSES, FLOWERING SHRUBS AND EVERGREENS

Water well the day before feeding. Sprinkle $\frac{1}{4}$ lb. evenly around base of plant and work lightly into top 1" of soil. Water thoroughly. Use every six weeks through the growing season.
