

# ROSES, FLOWERING SHRUBS AND EVERGREENS - NEW PLANTINGS

## General Information

### DESCRIPTION

Superior Turf Food is a premium quality homogeneous fertilizer product in a 2-1-1 ratio of Nitrogen, Phosphate and Potash combined with Sulfur, Iron, and Zinc. All of these are formed into a homogeneous pellet that is dust free and gives more uniform distribution of Primary, Secondary and Micro Nutrients during application. It is not merely a blend of several different materials, hence with homogeneous fertilizer there is no segregation.

### Limitations, Restrictions, and Exceptions

### DIRECTIONS FOR USE

#### ROSES, FLOWERING SHRUBS AND EVERGREENS

New plantings: Work  $\frac{1}{4}$  lb. into soil at bottom of hole before planting. Set plant, fill hole with soil and press down lightly. WATER THOROUGHLY.
