

GRAPES

General Information

CSC COPPER SULFUR DUST is a product containing sulfur and copper oxychloride sulfate, a fixed neutral copper.

Application of material containing sulfur should not be made just prior to or during periods of excessively high temperatures.

Limitations, Restrictions, and Exceptions

GRAPES

Use 20 pounds per acre. Apply at the time of berries begin to touch and thereafter is needed. For disease control the material must be applied before the disease appears. Concord and other Labrusca type grapes may be injured by sulfur.
