

## **FOLIAR APPLICATION**

### General Information

#### INFORMATION

KeyPlex Jumpstart promotes early root growth and can be used on most seeded and transplanted crops. It contains alpha-keto acids which may facilitate utilization of nutrients, and increase resistance to environmental stress. It also contains humic acid, which may enhance soil micronutrient availability.

### Limitations, Restrictions, and Exceptions

#### FOLIAR APPLICATION:

Apply 1-2 quarts of KeyPlex Jumpstart per acre in 100 gallons of water.
