

RATS

General Information

Application Directions: Determine where rats or mice are likely to find and consume bait, such as along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls or locations where rodents or their signs are seen. Remove as much alternative food as possible.

Limitations, Restrictions, and Exceptions

RATS

Rats: Place one 20g block every 15 to 30 feet.

Inspect bait regularly for signs of rodent activity. If signs of gnawing or eating of bait are noted, this bait should be replaced with toxic bait or traps until no new signs of rodent activity occur. Replace contaminated or spoiled bait immediately.
