

## FOR MOST PESTICIDES

### General Information

- Removes & Deactivates Residual Pesticide Contamination from Spray Equipment.
- Use to Clean Tank After Spraying.

SPRAY TANK CLEANER will remove and deactivate residual pesticide contamination from spray equipment. Use SPRAY TANK CLEANER before changing from one pesticide to another, or before storing equipment.

### Limitations, Restrictions, and Exceptions

#### Directions For Use:

Mix 1½ fluid ounces (3 tablespoons) of SPRAY TANK CLEANER with 2 gallons of water in the spray reservoir. Close sprayer and shake. Maintain solution contact for at least 15 minutes. Then, pump up sprayer and spray the solution through the hose and nozzle over bare ground or concrete. Repeat with clear water.
