

FOLIAR APPLICATIONS - MILD DEFICIENCY

General Information

GENERAL INFORMATION

MONTEREY MANGANESE SULFATE 31% is intended for manufacturing animal feed supplements or for agricultural use for plant nutrition.

DIRECTIONS FOR USE

MONTEREY MANGANESE SULFATE 31% is recommended for correction of manganese deficiency of citrus, corn, cotton, deciduous fruit & nut trees, beans and peas, onions, sugarbeets, small grains, etc.

APPLICATIONS: For the agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist or write to Monterey AgResources.

Limitations, Restrictions, and Exceptions

FOLIAR APPLICATIONS - MILD DEFICIENCY

Foliar: Applications to actively growing plants just before full leaf expansion will produce the best results. Thorough coverage and wetting are needed for optimum foliar spray results. Adjust application gallonage for equipment and/or crop coverage.

DO NOT apply to foliage when plants are suffering from moisture or heat stress. DO NOT apply to deciduous tree crops during bloom.

Solutions of MONTEREY MANGANESE SULFATE 31% may be prepared for dilute sprays according to nutritional need and the following ratios of product-to-diluent.

Mild Deficiency - 1-2 lbs. / 100 gals.
