

FOLIAR APPLICATIONS - SEVERE DEFICIENCY

General Information

GENERAL INFORMATION

MONTEREY MANGANESE-ZINC is intended for manufacturing animal feed supplements or for agricultural use for plant nutrition.

DIRECTIONS FOR USE

MONTEREY MANGANESE-ZINC is recommended for use on (but not limited to) the following crops for correction of manganese and zinc deficiencies: citrus, corn, cotton, deciduous fruit and nut trees, beans and peas, onions, sugarbeets, and small grains. Rates other than those suggested below may be applied depending on crop conditions and cultural practices. Consult your local State Agricultural Experiment Station or Extension Service for proper recommendations on the use of this product.

Limitations, Restrictions, and Exceptions

FOLIAR APPLICATIONS - SEVERE DEFICIENCY

- Use sufficient spray volume to insure thorough coverage and wetting needed for optimum results. Applications to actively growing plants just before full leaf expansion will produce the best results. DO NOT apply to foliage when plants are suffering from moisture or heat stress. DO NOT apply to deciduous tree crops during bloom.

Dilute: Prepare solution according to nutritional need and the following ratios of product to diluent. Adjust application gallonage for equipment and/or crop coverage.

Severe deficiency - 3 lbs./100 gal.
