

# SOIL APPLICATIONS: FOR FIELD AND VEGETABLE CROPS

## General Information

### GENERAL INFORMATION

MONTEREY ZBK is a premium, liquid formulation of zinc, boron, potash and nitrogen for general purpose plant nutrition of field, row, vegetable, vine and tree crops.

MONTEREY ZBK may be applied to the soil at planting, as a sidedress and in foliar sprays. Foliar sprays of MONTEREY ZBK are intended to complement good soil fertility programs by supplying nutrients directly to the foliage of crops during critical growth stages. It is not intended nor implied to be a substitute for sound soil fertilization and cultural practices.
