

SOIL APPLICATION: FIELD, ROW, & VEGETABLE CROPS

General Information

General Information

BRANDT SEQUESTAR CORN MIX is a fully chelated solution designed specifically for the prevention and/or correction of micro-nutrient deficiencies in corn, but may be used on all crops as a part of a balanced fertility program.

Mixing and Handling Instructions

Put 1/3 to 2/3 of total required water volume in tank. Add adjuvants, other fertilizers and pesticides if desired and agitate until thoroughly mixed. Add recommended amount of this product and agitate until mixed. Fill tank with remainder of water and buffer to pH 6-6.5. Caution: Check chemical mixture compatibility using a jar test prior to application.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION: BRANDT SEQUESTAR CORN MIX is recommended for use on all types of soils. Because this is a concentrated solution, it should be diluted before use to ensure uniform coverage. Soil applications may be made by drip, sprinkler or furrow irrigation systems or in band or broadcast fertilizer applications. For trees or individual plants, the product may be diluted as above or sprinkled directly on the soil uniformly under the plant's drip line, then watered in.

NOTE: The rates given are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.
