

SOIL APPLICATION - PREPLANT

General Information

DESCRIPTION

F POWER is a commercial fertilizer which also contains Fulvic acid derived from Leonardite. Leonardite results from the decomposition and compression of organic plant materials. Fulvic acid may aid in uptake of micro nutrients.

Limitations, Restrictions, and Exceptions

SOIL APPLICATIONS

F POWER may be used on all grain crops, potatoes, cotton, alfalfa, seed crops, beans, trees, vines, cole crops, tomatoes, sugar beets, peppers, rice, and vegetables, and horticulture crops. PREPLANT: F POWER per acre. When used with dry fertilizer, apply 1-2 gallons of F POWER per acre on the dry material. For best results work into the soil after application.
