

## FERTILIZER ADDITIVE

### General Information

#### DESCRIPTION

LEONARDITE is a commercial fertilizer which contains humic acid. Leonardite results from the decomposition and compression of organic plant materials. Humic acid may aid in uptake of micro nutrients.

#### Limitations, Restrictions, and Exceptions

#### FERTILIZER ADDITIVE

- Blend Leonardite into fertilizer at a rate that will deliver 300 - 500 lbs. of Leonardite per acre.
